

Indusec

PRESS RELEASE

Indusec is launching Strobe 10, a new and effective flash light as burglar protection. Strobe 10 is especially designed to produce a blinding effect, an intensive flash light. The intruder stops already in the door. It produces 0-12 flashes per second, selectable.

Strobe 10 strengthens Indusec's product portfolio. As it only requires a 10 A fuse it completes the earlier flash light Strobe 16.

Strobe 10 and 16 are with advantage combined with Inferno sound barriers for maximum effect, but can be used as a stand-alone security device.

Indusec is the world leader in high efficiency and advanced audio security products. The products are marketed under the name of Inferno and are installed at places or objects where a high security level is wished.
